Цель работы

Провести подготовительную работу по первоначальной настройке коммутаторов сети.

Выполнение работы

В логической рабочей области Packet Tracer разместим коммутаторы и оконечные устройства согласно схеме сети L1 (схема приведена в лабораторной работе) и соединим их через соответствующие интерфейсы (рис. #fig:002):

Используя типовую конфигурацию коммутатора, настроим все коммутаторы, изменяя название устройства и его IP-адрес согласно плану IP (рис. #fig:003 – #fig:007):

```
Commands, one per line. End with CNTL/Z.
Switch(config)#interface vlan2
Switch(config)#no shutdown
Switch(config)#interface Vlan2, changed state to up
Switch(config)#no shutdown
Switch(config)#interface protocol on Interface Vlan2, changed state to up
Switch(config)#no shutdown
Switch(config-if)#ip address 10.128.1.2 255.255.255.0
Switch(config-if)#exit
Switch(config)#ip default-gateway 10.128.1.1
Switch(config)#line vty
% Incomplete command.
Switch(config)#line vty 0 4
Switch(config-line)#password cisco
Switch(config-line)#login
Switch(config-line)#exit
Switch(config)#line console
% Incomplete command.
Switch(config)#line console 0
Switch(config-line)#password cisco
Switch(config-line)#login
Switch(config-line)#exit
Switch(config)#enable secret cisco
Switch(config)#service password-encryption
Switch(config)#ip domain-name donskaya.rudn.edu
Switch(config)#crypto key generate rsa
% Please define a hostname other than Switch.
Switch(config)#hostname msk-donskaya-sw-1-agko
msk-donskaya-sw-1-agko(config)#crypto key generate rsa
The name for the keys will be: msk-donskaya-sw-1-agko.donskaya.rudn.edu
Choose the size of the key modulus in the range of 360 to 4096 for your
General Purpose Keys. Choosing a key modulus greater than 512 may take
a few minutes.

How many bits in the modulus [512]: 2048
% Generating 2048 bit RSA keys, keys will be non-exportable...[OK]
